

Veracism UAT Form

Veracism is a secure academic document verification platform that uses blockchain and decentralized storage to protect records. It scans uploaded documents for threats using tools like ClamAV, YARA, and PDF phishing analysis while keeping files encrypted in tamper evident storage. It also allows fast authenticity checks through CID based verification and blockchain cross referencing.

This form is for User Acceptance Testing under the Veracism research proposal.

System Administrator Section

UAT-01

Task: Review administrator dashboard and core records.

Success Criteria: Dashboard data, recent records, and report information are visible and can be reviewed without access or display errors.

UAT-01 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-01 Evidence / Remarks

UAT-02

Task: Manage tenants, users, and API keys.

Success Criteria: Tenant records, user assignments, and API key actions are completed successfully and reflected correctly in the interface and audit trail.

UAT-02 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-02 Evidence / Remarks

UAT-03

Task: Manage security and monitoring settings.

Success Criteria: YARA and ClamAV related actions complete successfully, system health is visible, and audit logs can be reviewed or exported as intended.

UAT-03 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-03 Evidence / Remarks

System Administrator Completed

Tenant Administrator (Administration Office / ISM offices) Section

UAT-04

Task: Upload and manage report files.

Success Criteria: Valid file operations complete successfully, reports are associated correctly, CID and QR data are available, and file records appear with the correct status.

UAT-04 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-04 Evidence / Remarks

UAT-05

Task: Handle invalid file actions and restricted modification paths.

Success Criteria: Invalid or rejected actions show clear system responses, and no improper content modification path is exposed through normal user actions.

UAT-05 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-05 Evidence / Remarks

UAT-06

Task: Manage related student or integrator records.

Success Criteria: Student or integrator information can be viewed and managed correctly, and related records remain visible and consistent in the interface.

UAT-06 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-06 Evidence / Remarks

Tenant Administrator (Administration Office / ISM offices) Completed

IT Integrator / Developer Section

UAT-07

Task: Execute the intended API integration workflow.

Success Criteria: Valid API requests return the expected identifiers, metadata, download, or status results, while invalid requests are rejected without creating an unintended record.

UAT-06

Task: Manage related student or integrator records.

Success Criteria: Student or integrator information can be viewed and managed correctly, and related records remain visible and consistent in the interface.

UAT-06 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-06 Evidence / Remarks

Tenant Administrator (Administration Office / ISM offices) Completed

IT Integrator / Developer Section

UAT-07

Task: Execute the intended API integration workflow.

Success Criteria: Valid API requests return the expected identifiers, metadata, download, or status results, while invalid requests are rejected without creating an unintended record.

UAT-07 Result *

- ☒ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-07 Evidence / Remarks

IT Integrator / Developer Completed

External Verifier (Students, Auditors,Public User) Section

UAT-08

Task: Verify a report through the public portal using QR code or CID entry.

Success Criteria: The public portal displays the correct result for valid, invalid, tampered, or unavailable cases without requiring internal access and without exposing sensitive internal details.

Valid CID : bafkreiac4pxp47nfr77duhvz xu25w3fd7kkpmcatpofaah3imenotp4kyy

Veracism UAT Form

Veracism is a secure academic document verification platform that uses blockchain and decentralized storage to protect records. It scans uploaded documents for threats using tools like ClamAV, YARA, and PDF phishing analysis while keeping files encrypted in tamper evident storage. It also allows fast authenticity checks through CID based verification and blockchain cross referencing.

This form is for User Acceptance Testing under the Veracism research proposal.

System Administrator Section

UAT-01

Task: Review administrator dashboard and core records.

Success Criteria: Dashboard data, recent records, and report information are visible and can be reviewed without access or display errors.

UAT-01 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-01 Evidence / Remarks

UAT-02

Task: Manage tenants, users, and API keys.

Success Criteria: Tenant records, user assignments, and API key actions are completed successfully and reflected correctly in the interface and audit trail.

UAT-02 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-02 Evidence / Remarks

UAT-03

Task: Manage security and monitoring settings.

Success Criteria: YARA and ClamAV related actions complete successfully, system health is visible, and audit logs can be reviewed or exported as intended.

UAT-03 Result *

- ☐ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-03 Evidence / Remarks

System Administrator Completed

Tenant Administrator (Administration Office / ISM offices) Section

UAT-04

Task: Upload and manage report files.

Success Criteria: Valid file operations complete successfully, reports are associated correctly, CID and QR data are available, and file records appear with the correct status.

UAT-04 Result *

- ☒ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-04 Evidence / Remarks

UAT-05

Task: Handle invalid file actions and restricted modification paths.

Success Criteria: Invalid or rejected actions show clear system responses, and no improper content modification path is exposed through normal user actions.

UAT-05 Result *

- ☒ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-05 Evidence / Remarks

UAT-06

System Administrator Section

UAT-01

Task: Review administrator dashboard and core records.

Success Criteria: Dashboard data, recent records, and report information are visible and can be reviewed without access or display errors.

UAT-01 Result *

- ☐ Passed
- ☒ Partially Completed
- ☐ Failed

UAT-01 Evidence / Remarks

Summary of information that can be seen in the system were loaded successfully without any error. Should include redirect links for every summary (more details or view full report).

UAT-02

Task: Manage tenants, users, and API keys.

Success Criteria: Tenant records, user assignments, and API key actions are completed successfully and reflected correctly in the interface and audit trail.

UAT-02 Result *

- ☒ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-02 Evidence / Remarks

All required tasks were completed successfully. Tenant records, user assignments, and API key actions were properly configured and verified. All changes are accurately reflected in the interface and audit trail.

UAT-03

Task: Manage security and monitoring settings.

Success Criteria: YARA and ClamAV related actions complete successfully, system health is visible, and audit logs can be reviewed or exported as intended.

UAT-03 Result *

- ☒ Passed
- ☐ Partially Completed
- ☐ Failed

UAT-03 Evidence / Remarks

All security and monitoring settings were successfully configured and verified. YARA and ClamAV actions functioned as expected, system health is clearly visible, and audit logs can be reviewed and exported without issues.

System Administrator Completed
